## Summary

Detail-oriented MCA student with a strong foundation in SQL, Python, Excel, Power BI, and Tableau. Skilled in data cleaning, analysis, and visualization to generate actionable insights and support data-driven decision-making. Passionate about working on real-world analytical projects and collaborating in fast-paced, results-driven environments.

## Education

### Master of Computer Applications (MCA)

Pimpri Chinchwad University, Pune, Maharashtra

Pursuing: 2026

CGPA: 8.42 / 10

### Bachelor of Computer Applications (BCA)

Ambalika Institute of Higher Education, Lucknow, Uttar Pradesh

Graduated: 2024

Percentage: 71%

## Skills

**Technology Stack:** SQL, Python, HTML, CSS

**Data Visualization Tools:** Microsoft Excel, Power BI, Tableau

**Development Tools:** Git, GitHub, VS Code

**Analytical Abilities:** Data Analysis, Exploratory Data Analysis (EDA), Statistical Analysis, Insight Generation, KPI Reporting

## Projects

### World University Rankings — Statistical Analysis | Python

Jan 2026 – Feb 2026

- Evaluated 1,000+ university ranking entries using advanced statistical and data analysis techniques.
- Performed correlation and trend analysis across 5 key performance drivers.
- Engineered weighted scoring metrics to compare global institutional standings.
- Generated analytical findings and summary reports leveraging Python libraries (Pandas, Matplotlib).

### Orion Hardware — Dynamic Tableau Sales Dashboard | MySQL, Tableau

Nov 2025 – Dec 2025

- Architected an engaging Tableau dashboard utilizing the Sample Superstore dataset (9,994 records) to evaluate sales and profitability.
- Monitored 6+ primary KPIs, including revenue, profit margin, order trends, and regional metrics.
- Executed data cleaning, preprocessing, and modeling by integrating Tableau with MySQL Workbench.
- Designed 15+ visualizations (cards, slicers, funnel charts, and tables) for real-time business intelligence reporting.

### SmartCart — Product Suggestion Web Application | Python, ML, HTML, CSS

Oct 2025 – Nov 2025

- Constructed a recommendation engine utilizing 50,000 user-product interaction data points to enhance product discovery.
- Implemented similarity-based logic to produce top 9+ personalized product suggestions per session.
- Developed a responsive front-end with 6+ user-centric UI components using HTML, CSS.

## Certifications

- Introduction to Data Science  
IBM — Coursera  
July 2025
- Databases and SQL for Data Science with Python  
IBM — Coursera  
July 2025
- Advanced AI and Machine Learning Techniques with Capstone  
Microsoft — Coursera  
April 2025

## Strengths

Analytical Mindset, Critical Reasoning, Fast Adaptability, Problem Solving, Detail Focus, Self Initiative, Communication
