Summary

Data-driven Analyst with hands-on experience in SQL, Python, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis (EDA), statistical analysis, and dashboard development to drive business decision-making. Additionally experienced in applying machine learning techniques to solve real-world problems, with a strong interest in building practical AI-driven solutions.

Skills

Technology Stack: Python, SQL, HTML, CSS

Libraries/Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn

Data Visualization Tools: Advanced Excel, Power BI

Development Tools: GitHub, VS Code, Git

Analytical Abilities : Data Analysis, Exploratory Data Analysis (EDA), Statistical Analysis, Insight Generation, KPI Reporting

Experience

Data Annotation – Deccan AI (Freelance)

- Working on utilizing SQL for data processing and analysis aligned with business requirements
- Performed data cleaning, transformation, and preprocessing to support accurate analysis and reporting
- Ensured data quality through validation, consistency checks, and preprocessing techniques.

Projects

AI Crime Prediction & Safety Map | Python, React, Scikit-learn, Joblib, Leaflet, Feb 2026 – Apr 2026

- Developed an AI-based crime prediction system using ML achieving 85% accuracy on 100K+ crime records.
- Performed data preprocessing and feature engineering using Pandas, NumPy, and Scikit-learn.
- Integrated ML model using Joblib and created APIs (/predict, /map-data).
- Visualized crime-prone areas using Leaflet maps and Recharts dashboards.
- Built a full-stack application using React and Flask with real-time prediction via REST APIs.

M C Stays — AI Integrated Accomodation Platform | Python(Fast API), React.js, Prisma ORS Jan 2025 – Feb 2026

- Architected a dual-service system using React/Node.js and a Python FastAPI ML microservice for high-performance AI integration.
- Developed an AI matching engine using Scikit-learn to provide personalized PG recommendations and lifestyle-based roommate compatibility.
- Implemented predictive models for vacancy forecasting and automated yield management using Linear Regression.
- Integrated automated PDF agreements, QR-code check-ins, and heuristic-based fraud detection for a secure rental workflow.

Smart Cart — Product Suggestion Web Application | Python, ML, HTML, CSS Sep 2025 – Nov 2025

- Constructed a recommendation engine using 50,000+ user-product interaction data points to improve product discovery.
- Implemented similarity based logic to produce top 9+ personalized product suggestions per session.
- Improved recommendation relevance by applying similarity based filtering on interaction data.
- Developed a responsive front-end with 6+ user centric UI components using HTML, CSS.

Education

Master of Computer Applications (MCA) 2024 - 2026

Pimpri Chinchwad University, Pune, Maharashtra CGPA: 8.42 / 10

Bachelor of Computer Applications (BCA) 2021 - 2024

Ambalika Institute of Higher Education, Lucknow, Uttar Pradesh Percentage: 71%
