Professional Summary

Data-driven Analyst with hands-on experience in **SQL, Python, Advanced Excel, and Power BI**. Proven ability to automate repetitive tasks and perform complex data cleaning, exploratory data analysis (EDA), and statistical analysis to support accurate reporting. Skilled in generating actionable insights and developing dashboards to drive business decision-making and campaign performance.

Skills

Technology Stack: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn).
Data Visualization Tools: Advanced Excel, VLOOKUP, HLOOKUP, XLOOKUP, Pivot Tables, Power BI
Development Tools: GitHub, VS Code, Git
Core Concepts: Core JAVA, OOPs Concepts, DBMS, Agile/Scrum, Requirement Gathering (BRDs/FRDs), UAT
Analytical Abilities: Data Analysis, Exploratory Data Analysis (EDA), Statistical Analysis, Insight Generation, KPI Reporting, ETL Concepts, Predictive Analytics, Data Transformation, Dashboard Development

Experience

Data Annotation– Deccan AI (Freelance)

Automated repetitive data preparation tasks to improve analytical efficiency.
Performed data cleaning, transformation, and preprocessing to support accurate analysis and reporting
Ensured data quality through validation, consistency checks, and preprocessing techniques.

Projects

SafeGuard Pro | Python, React, Scikit-learn, Joblib, Leaflet, TensorFlow, XG Boost, SHAP Feb 2026 – Apr 2026

- Developed an AI-based crime prediction system using ML achieving 85% accuracy on 100K+ crime records.
- Performed data preprocessing and feature engineering using Pandas, NumPy, and Scikit-learn.
- Integrated ML model using Joblib and created APIs (/predict, /map-data)
- Visualized crime-prone areas using Leaflet maps and Recharts dashboards.
- Built a full-stack application using React and Flask with real-time prediction via REST APIs.

M C Stays— AI Integrated Accomodation Platform | Python(Fast API), React.js, Prisma ORS Dec 2025 – Jan 2026

- Architected a dual-service system using React/Node.js and a Python FastAPI ML microservice for high-performance AI integration.
- Developed an AI matching engine using Scikit-learn to provide personalized PG recommendations and lifestyle-based roommate compatibility.
- Implemented predictive models for vacancy forecasting and automated yield management using Linear Regression.
- Integrated automated PDF agreements, QR-code check-ins, and heuristic-based fraud detection for a secure rental workflow.

Smart Cart — Product Suggestion Web Application | Python, ML, KNN, TF-IDF, SQLite3 Oct 2025 – Nov 2025

- Constructed a recommendation engine using 50,000+ user-product interaction data points to improve product discovery.
- Implemented similarity based logic to produce top 9+ personalized product suggestions per session.
- Improved recommendation relevance by applying similarity based filtering on interaction data.
- Developed a responsive front-end with 6+ user centric UI components using HTML, CSS.

Education

Master of Computer Applications (MCA)
Pimpri Chinchwad University, Pune, Maharashtra

Bachelor of Computer Applications (BCA)
Ambalika Institute of Higher Education, Lucknow, Uttar Pradesh

2024 – 2026
CGPA: 8.42 / 10

2021 –2024
Percentage: 71%

Certifications

- Database and SQL for Data Science with Python – **IBM**
- Foundations of AI and Machine Learning - **Microsoft**
