Professional Summary

Analytical MCA graduate specializing in translating raw datasets into actionable business insights. Proficient in SQL database querying, Python data pipelines (Pandas, NumPy), and Power BI dashboard development. Combines strong exploratory data analysis (EDA) foundations with hands-on experience managing data quality validation at scale for **NVIDIA AI** initiatives. Seeking to leverage data manipulation and statistical tracking skills in a dedicated Data/Business Analyst role.

Skills

Programming & Databases: SQL, MySQL, Python (Pandas, NumPy, Matplotlib).
Data Visualization Tools: Advanced Excel, VLOOKUP, HLOOKUP, XLOOKUP, Pivot Tables, Power BI.
Development Tools: GitHub, VS Code, Git.
Core Concepts: Core Java, OOPs Concepts, DBMS, Agile/Scrum, Requirement Gathering (BRDs/FRDs), UAT.
Analytical Abilities: Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization, Statistical Analysis, Insight Generation, KPI Reporting, Reporting, ETL Concepts, Predictive Analytics, Data Transformation, Dashboard Development, Data Quality Assurance.

Experience

Associate Process Executive | Randstad India Pvt. Ltd. (Client: NVIDIA)June 2026 – July 2026

- Processed and manage large-scale image, video, and sensor datasets that support computer vision and autonomous vehicle machine learning applications.
- Performed quality validation of labeled datasets to ensure compliance with annotation standards and maintain **90%+** accuracy requirements.
- Reviewed and maintain high-quality training datasets for machine learning applications.
- Performed data quality assurance (QA) and validation metrics, systematically identifying and correcting labeling anomalies to ensure dataset consistency.

Projects

Talent Pool Search|AI-Resume Processing System | Next.js 16, React, Supabase, Gemini APIMay 2026-Jun 2026

- Architected a privacy-first PII isolation filter that locally identifies and redacts candidate names, emails, phone numbers, and social links using optimized RegEx heuristics prior to LLM analysis.
- Developed an AI-powered extraction pipeline using Google Gemini 1.5 Flash to automatically index candidate skills, location, target job titles, and experience metrics from unstructured files.
- Integrated multi-format document parsers using pdf-parse and mammoth to dynamically extract text from raw PDF and MS Word (.docx) resumes.
- Implemented an interactive recruiter dashboard featuring multi-parameter keyword searching, experience filtering, and a side-by-side comparison interface for raw vs. scrubbed resume data.

SafeGuard Pro | Python, React, Scikit-learn, Joblib, Leaflet, TensorFlow, XGBoost, SHAPApr 2026 – May 2026

- Developed an AI-based crime prediction system using ML achieving 85% accuracy on 100K+ crime records.
- Performed data preprocessing and feature engineering using Pandas, NumPy, and Scikit-learn.
- Integrated ML model using Joblib and created APIs (/predict, /map-data).
- Visualized crime-prone areas using Leaflet maps and Recharts dashboards.
- Built a full-stack application using React and Flask with real-time prediction via REST APIs.

Education

Master of Computer Applications (MCA)2024 – 2026
Pimpri Chinchwad University, Pune, MaharashtraCGPA: 8.24 / 10

Bachelor of Computer Applications (BCA)2021 –2024
Ambalika Institute of Higher Education, Lucknow, Uttar PradeshPercentage: 71%

Certifications

- Database and SQL for Data Science with Python – **IBM**
- Foundations of AI and Machine Learning - **Microsoft**
