Summary

Detail-oriented MCA student with a strong foundation in SQL, Python, Excel and Power BI. Skilled in data cleaning, analysis, and visualization to generate actionable insights and support data-driven decision-making. Passionate about working on real-world analytical projects and collaborating in fast-paced, results-driven environments.

Skills

Technology Stack: SQL, Python, HTML, CSS

Data Visualization Tools: Microsoft Excel, Power BI

Development Tools: GitHub, VS Code, Git

Analytical Abilities: Data Analysis, Exploratory Data Analysis (EDA), Statistical Analysis, Insight Generation, KPI Reporting

Projects

World University Rankings — Statistical Analysis & Visualization | Python, Power BI **Jan 2026 – Feb 2026**

- Analyzed 2,600+ global university ranking records using Python (Pandas, Matplotlib) to extract statistical insights.
- Performed data cleaning, missing value treatment, and type conversion on real-world datasets.
- Conducted descriptive statistics, correlation, and year-wise trend analysis on teaching, research, and citation metrics.
- Built an interactive Power BI dashboard with KPIs, country-wise comparisons, and Top 10 university analysis.

Orion Hardware — Interactive Power BI Sales Dashboard | MySQL, Power BI **Dec 2025 – Jan 2026**

- Architected an engaging Power BI dashboard utilizing the Sample Superstore dataset (9,994 records) to evaluate sales and profitability.
- Monitored 6+ primary KPIs, including revenue, profit margin, Average Discounts, and regional metrics.
- Executed data cleaning, preprocessing, and modeling by integrating Power BI with MySQL Workbench.
- Designed 15+ visualizations (cards, slicers, Maps, and tables) for real-time business intelligence reporting.

SmartCart — Product Suggestion Web Application | Python, ML, HTML, CSS **Oct 2025 – Nov 2025**

- Constructed a recommendation engine using 50,000+ user-product interaction data points to improve product discovery.
- Implemented similarity-based logic to produce top 9+ personalized product suggestions per session.
- Developed a responsive front-end with 6+ user-centric UI components using HTML, CSS.

Achievements

Completed Kaggle Anomaly Detection Challenge (AnaVerse 2.0) | Python, Machine Learning **2025**

- Developed an anomaly detection model to predict irregular patterns in an energy manufacturing plant using sensor data (X1–X5).
- Performed data preprocessing, feature analysis, and outlier detection on time-series sensor datasets.
- Applied machine learning techniques to identify abnormal operational behavior and improve predictive monitoring.

Education

Master of Computer Applications (MCA)

2024 - 2026

Pimpri Chinchwad University, Pune, Maharashtra

CGPA: 8.42 / 10

Bachelor of Computer Applications (BCA)

2021 - 2024

Ambalika Institute of Higher Education, Lucknow, Uttar Pradesh

Percentage: 71%

Certifications

- Introduction to Data Science
IBM — Coursera **July 2025**
- Databases and SQL for Data Science with Python
IBM — Coursera **July 2025**
- Advanced AI and Machine Learning Techniques with Capstone
Microsoft — Coursera **April 2025**
